EXPERIENCE

I'm a fresher and I Have Experience in the Projects that I have made with different technology in FrontEnd.

MyQuran Audio Application

- The Application has more than 20 Languages for Quran Audio.
- You can switch Theme Color (Light, Dark) Mode.
- Save data in Local Storage like Favorites list, Theme, Language.
- I used React, Redux, Axios, styled Components, React Router, Firebase
- Github: https://github.com/MBajaber/my_quran_app_full_source
- Website: <https://elegant-ramanujan-86644d.netlify.app>

E-Commerce Application

- E-commerce with different categories and I connected to Stripe checkout to continue the Payment Process.
- I used React, Redux, Axios, React Router, Firebase, and Backend Node.
- Github: https://github.com/MBajaber/e-commerce_frontEnd_backEnd
- Website: <https://stoic-raman-aff1d8.netlify.app>

Chatting Message Application

- Chatting Application like What's app.
- You can see all users and who is Online and Offline.
- I used React, Redux, React Router, and Firebase for Authentication and Realtime Database.
- Github: https://github.com/MBajaber/chatting_app_full_project
- Website: <https://keen-lalande-9b60c4.netlify.app>
